

SAFETY AND SECURITY MIRRORS

Increase Visibility...

Prevent Accidents and Deter Theft

**MADE IN
THE USA**

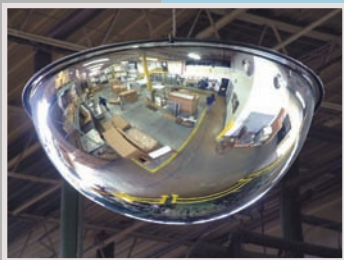

CONVEX CIRCULAR MIRRORS

- 160° of Viewing Area
- Suitable for almost any security or safety application
- Available in both acrylic and polycarbonate lenses

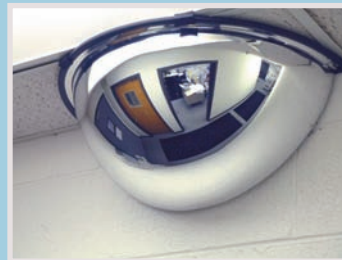

CONVEX ROUNDTANGULAR MIRRORS

- 160° of Viewing Area
- Cropped top and bottom allows installation in areas with low clearance
- Available with an acrylic lens

FULL DOME MIRRORS

- 360° of Viewing Area
- Intended to prevent collisions at 4-way intersections and for monitoring rooms with obstructed views
- Available in both acrylic and polycarbonate lenses

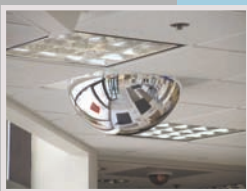

HALF DOME MIRRORS

- 180° of Viewing Area
- Perfect for hallways at "T" intersections
- Available in both acrylic and polycarbonate lenses

QUARTER DOME MIRRORS

- 90° of Viewing Area
- Perfect for elevators
- Available in both acrylic and polycarbonate lenses

T-BAR DOME MIRRORS

- Use the T-Bar Mini Dome Mirror in offices to deter theft
- The Black Dome can be used to give the impression of camera security

T-BAR BLACK DOMES

T-Bar Domes and Flat Panel Mirrors have flanges that allow them to be dropped into 2' x 2' or 2' x 4' openings in suspended ceiling to replace existing ceiling tiles

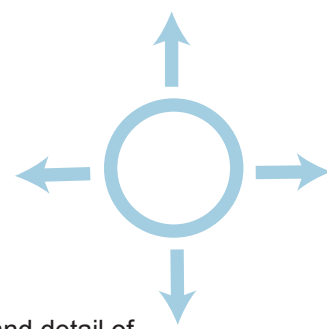

FLAT PANEL MIRRORS

- Flat Panel Mirrors are suitable for cubicle surveillance and decorative purposes
- A See Through Flat Panel Mirror is available for camera placement

SAFETY AND SECURITY MIRRORS

CHARACTERISTICS OF LENS MATERIAL

Acrylic: Good weather resistance, average impact resistance, and high reflectivity

Polycarbonate: Average weather resistance, excellent impact resistance, and good reflectivity

SIZING GUIDELINES

As these mirrors reduce the image size, it is important to use a mirror that is large enough to allow visibility and detail of the area you are monitoring. A good rule of thumb is to use one inch of mirror diameter for every foot of distance you are from the area you are monitoring (watching a 30' area, select a 30" diameter mirror).

INSTALLATION

Convex Mirrors: Mounting hardware is included along with easy to follow instructions. Convex mirrors feature heavy duty adjustable ball-swivels and corrosion resistant steel brackets.

Dome Mirrors: Dome mirrors have pre-drilled holes for direct ceiling installation. Full domes include hanging chains. Half and Quarter Dome mirrors feature the Easy Clip system for fast installation on suspended grid ceilings.

CLEANING AND MAINTENANCE

Clean with a microfiber cloth using ammonia free glass cleaner or a gentle soap and water solution. Do not use any harsh chemicals or abrasive cleaning materials.
